Loopline Warranty Policy

Loopline E-Bikes is a fictional shop. This document exists to demo CiteDesk.

1. Overview

This warranty covers bikes bought new from Loopline E-Bikes, in store or online. It starts on the delivery date. To make a claim you need your proof of purchase and the frame number, which is engraved under the bottom bracket.

2. Frame

Frames are covered for 10 years against manufacturing defects such as cracks in welds. Warranties are for the original owner and are not transferable, with one exception: the frame warranty passes to a second owner for the remaining period if the original receipt is provided.

3. Motor and battery

The motor and the battery are covered for 2 years. The battery is also considered defective, and is replaced, if its capacity drops below 70% of the original within 2 years or 800 full charge cycles, whichever comes first. A gradual capacity loss that stays above 70% is normal ageing and is not a defect.

4. Other components

The display, controller, wiring and integrated lights are covered for 2 years. Wear parts (tyres, inner tubes, brake pads, chain, cassette and chainrings) are only covered against manufacturing defects that appear in the first 6 months.

5. What is not covered

- Damage from accidents, falls, misuse, racing or jumps.
- Bikes fitted with a speed tuning kit or other unauthorised modifications: the whole warranty is void.
- Water damage from immersion or cleaning with a pressure washer.
- Damage caused by chargers other than the original Loopline charger.
- Bikes used in commercial rental fleets, which have a separate 1-year warranty.

6. How to make a claim

Contact support with your frame number, proof of purchase and photos or a short video of the problem. Bring the bike to the Hilltop workshop or ship it to us. We diagnose it within 5 working days and then repair or replace the faulty part. If a warranty repair takes longer than 7 days, we lend you a bike while you wait, subject to availability.
